**Jarret x Lucifer**

Sky was bought in French kennel in Charmoy, where he achieved great results.

Sky is a descendant of the bull Jarret, whose sons have impressed us very much in the last two years at Charmoy.

His dam is the first dam by Lucifer (milkiness 113). Sky himself weighed only 46 kg at birth, the genomic breeding value for this trait is at 107.

Sky is not a carrier of ataxia and no gene for double muscling, which is now seen as an advantage in purebred breeding.
